Peter,

Please consider this email to be our formal submittal of our small mine permit for the Gunnison Valley Mine. This email contains one of the two required maps due to the size of the file. The second map will follow in an additional email. Thank you for your help in completing this process.

Thanks again,

Cody Sweat

Peter,

Please find the operations map attached to this email for your review, the second of two maps required for the small mine permit application.

Thanks,

Cody Sweat

Salt Lake City, Utah 84116

Dear Mr. Brinton,

Mountain Valley Stone is requesting your review and approval of the following Notice of Intent to Commence Small Mining Operations. Please see the attached documents.

In the process of commencing mining operations, Mountain Valley Stone will assume all existing mining disturbances that were created by the previous mining operation, Antelope Valley Mine, operated by Wheeler Zamaroni. This area is clearly marked in the attached map. This includes taking over all reclamation bonding requirements as the mine currently sits and future reclamation bonding requirements needed as mining operations resume under Mountain Valley Stone ownership. The current disturbance is about 1 ½ acres of mining area and about a ½ mile of two track road.

Mountain Valley Stone is currently in the process of completing a Cultural Survey of the mining area but is requesting to commence mining operations in the previously disturbed area that currently exists while this requirement is completed. Our proposed start-up date is October 1st 2015.

Thank you for your consideration,

Sincerely,

Robert Hicken
President
Mountain Valley Stone
